A NEW DISCOVERY!

Spiritualism Explained.

The question of questions, with the learned and unlearned, with the learned and unlearned, of all this division in the camp will finally come to a small Democratic victory. It will be a new sensation to witness a Republican back-down, but it is coming. Our side has, there in Congress, generally under the head of Physics, or does it come from supernatural causes and without laws or order. That the phenomena exists, is beyond dispute, whether it will ever be explained remains to be seen. That some spirits can be seen, handled and made use of to a good advantage as well as explained is also a fact to which all druggists and chemists can testify. They need not be named, because their name is legion. We refer principally to those agencies. Saur's Drug and Medicine Depot harbors a large number of healing spirits which restoring the health of the afflicted This same drug store it seeks to make itself useful sis upon which he proposed it, however, was the withdrawal of the nomination of and to benefit mankind. WASHINGTON LETTER.

From our regular Correspondent. WASHINGTON, May 2, 1881. So great has been the pressure for exe-cutive sessions of the Senate, to confirm some of the important nominations, that evidences of a break have gathered during the last few days. It is plain that a majority of the Republican Senators desire to give way. They are tired of the contest and well satisfied that it is not doing them any good before the country. ing them any good before the country, but the question is how to change front decided to permit executive sessions for confirming the more urgent nominations over which there is no special contest, there will then be great difficulty in continuing the Mahone-Riddleberger struggle. The bottom would fall out of it in a hurry and the bot weather, such as we have had this week for instance would itself and the stables, where a number of horses are kept saddled and british the stables and the stables are kept saddled and british the stables are kept saddled and bri soon cause an adjournment. Senator Conkling, who opposes going into executive session, played it pretty sharp on the Administration Senators by pretending to be ready to take up the Robertson fight and warning them that they must take the responsibility of his defeat. This rather disconcerted the President's friends who were working for executive sessions. who were working for executive sessions. Conkling intimated that he had counted

Brady and the contractors so far impli-Brady and the contractors so far impli-cated only meet the accusations against them with bold general denials. The Whiskey ring scamps did the same; so, also, did Tweed in his time. But there is ample evidence that what has been charged is not all falsehood and slander. One laughable feature of Brady's defense is his attempt to make Samuel J. Tilden responsible for his downfall. It has been responsible for his downfall. It has been admitted that Mr. Tilden stole Charley Ross and that, very likely, he wrote the Morey letter, all of which was pretty bad, but here is still another crime for him to but here is still another crime for him to expiate. Brady's Washington newspa-per, edited by George C. has been secured is such that actual fraud is difficult to prove though it may be very apparant. It consists in raising the compensations after contracts are let, upon the ground of increased or "expedited" service. For instance, A and B are competitors for a contract worth about \$15,-000, over a route requiring three trips a week. A is an honest bidder and files medicines through which spirits his estimate in good faith. B is a jobber, figure largely as restorative and by an understanding with the authorities in charge of the letting, makes his bid below the actual cost of perform-ing the service. He gets the job and straightway sets about getting signatures along the route petitioning for daily trips and "expedited" service. This sort of thing being done on about 93 small sum of money and if used routes, makes a good thing for not only the contractors but for their confederates in the Department with whom they are according to directions will be supposed to divide. In most of these cases the increase in compensation is the means of relieving pain and nearly all profit, as the extra expense is contract office are in perfect order.

Extraordinary Precautions Against the Assassination of the New Czar.

NEW YORK, April 28 .- A letter from St. Petersburg gives a gloomy account of the new Czar's life at the castle Gatschina, thirty miles from the Capital. Before the Court removed thither several hundred artisans of the Procobrojinsky Regiment were sent to make the necessary alterations. At midnight they were without yielding to the Democrats. TO THE DEATH.

That is the Spirit of the War Between Conkling and The Administration.

NEW YORK, May 2,-The Times' dispatch from Washington says the contro-versy growing out of the nomination of Judge Robertson for Collector at New York is regarded by Republican Senators, so far as results are concerned, should the issue be joined in the Senate over the nomination, as having passed beyond a mere question of the individual triumph of the President over Senator Conkling, and as involving a breach in the party in the State of New York and elsewhere, that would lead to disaster at the coming elections for members of the next Con-gress. If the nomination of Judge Robertson is kept before the Senate, Republican Senators say serious results will follow to the party, no matter what may be the action of the Senate; and the question that Republican Senators will be called upon to decide is, will rejection

or confirmation be less disastrous?

Conkling appeared by invitation before the Caucus Committee, and made a long and carnest protest against confirmation, and to all appeals declined to modify his opposition in the slightest degree. He was determined, he said, to use every effort to defeat confirmation, and, so far as he was concerned, nothing short of the withdrawal of Judge Robertson's nomination would avert the struggle. He would not only fight the nomination in secret session and at every stage, but should it be determined to act affirmatively on it, he would carry the contest into the open session of the Senate, and publicly arraign the President for wanton breach of faith—pledged first at New York during his visit at the special invi-tation of the President. The Thieves Quarreling-Threats Against Garfield and Hayes.

WASHINTON, April 30, - Dorsey, charged with being in the star rout ring, pub-li-hes a letter denying not the existence of the ring but that he was in it. He intimates that Brady is a rascal and that he ought to be prosecuted. Brady on the other hand threatens all sorts of evil upon the administration if the investion the administration if the investigation is not stopped. It is well for
the President that he is fortifying himself at the outset, because their is information in possession of the ring upon
which charges might be brought that he
could not well overlook unless the exposure could have so far progressed as to
make the charges appear simply vindictive. They are very serious for one in tive. They are very serious for one in his position and with his aspirations and have never yet been published. It will thus be seen that other considerations that pressure upon the Executive to drop the matter for party reasons with a sim-ple exposure are likely to govern devel-opments in the case. Those who claim to know say that no criminating evidence will be furnished by the beneficiaries of the expedited routes upon which suit can be brought, and claims that without such evidence a suit would not stand. A quarrel among themselves, it is said, would alone make the necessary revela-tions for successful presecutions. Of the probability of that nothing can now be foretold, although the contractors whose pay is to be cut down to a reasonable basis will doubtless become disaffected. It is said that Brady has a letter of Garfield's in his possession, showing that Garfield knew of the thefts and knew that part of the stolen money was sent to Indiana to buy that State. It is also said that Hayes knew all about the stealing but would not interfere lest it would hurt the party.

Voting Qualifications in the State of Rhode Island.

The franchise in Rhode Island not peing very well understood by the public, the following explanation of the matter is made as brief and succinct as possible: There are two clases of voters in Rhode Island, property and registry voters. Both can vote for all general officers, Mayors and general city officers, and Presidential Electors, but only property voters can ballot for membership of City Councils in cities, the idea governcontinue the four years' war upon the Administration that he believes will inevitably follow, will resign his seat in the Senate. Second, those born is the complex of the property voters by a residence of two years in the States and six months in the town; or they become property voters by a residence of one year and owning \$134 value of real estate. es. They cannot become registry voters, nor voters in any way, except by owning real estate, but when made voters by owning such real estate, they vote for officers of every kind. It is this imparative clause, that in Rhode! Island naturalized citizens must own real estate to the value of \$134, which is not generally known. Besides the qualifications for registry voters, these persons must have their names duly entered in the registry list before the end of December of the preceeding year, and must pay \$1 regis-try fee before the 10th day of January of the year in which they intend to vote. Registry voters of American buth can become property voters by paying a tax on \$134 worth of property, real or personal. Men native born, without property, real or personal, may be taxed for a nominal sum of \$300 personal so called, and thus become property voters.
